SUMMARY

MSc student in Computer Science & Engineering at DTU, specialising in Artificial Intelligence and Algorithms. Strong analytical and structured problem-solver with experience in data-driven systems, optimisation, and building efficient solutions. Interested in applying data analysis and structured approaches to support decision-making and real-world systems.

EDUCATION

Technical University of Denmark (DTU)	2024 – Present
<i>MSc in Computer Science and Engineering (AI & Algorithms)</i>	Lyngby, Denmark
University of East London & Metropolitan College	2021 – 2024
<i>BSc (Hons) in Computer Science – First Class (80%)</i>	Patras, Greece
• Awarding Institution: University of East London, Teaching Institution: Metropolitan College	

TECHNICAL SKILLS

Programming : Python (data analysis, algorithms), Java, SQL
Data & Tools : Excel, Git, GitHub, Figma
Other : Basic web technologies (HTML, CSS, PHP)

PROJECTS

Multi-Agent AI System — Hospital Planning (DTU)	2025
• Built a multi-agent planning system to solve Sokoban-style hospital logistics problems. • Combined A* search with Conflict-Based Search (CBS). • Improved performance using weighted A* and heuristic design.	
Biometric Face Recognition (2D vs 3D) (DTU)	2025
• Developed a face recognition pipeline comparing 2D deep learning and 3D geometric methods (UMB-DB dataset). • Used InsightFace (2D) and FPFH descriptors with Open3D (3D). • Evaluated performance using DET curves and Equal Error Rate (EER).	

ACTIVITIES

Disability Tech Hackathon	2026
<i>Participant – Inclusive Technology Innovation</i>	Denmark
• Collaborated in a multidisciplinary team to design and prototype solutions addressing real-world accessibility challenges. • Participated in workshops, mentoring sessions, and final project pitching to industry experts.	
EVOLVED-5G European Research Programme	2022
<i>Workshop Participant – 5G Networks Programmability</i>	Greece
SFIMMY 13 – Student Conference on Informatics	2022
<i>Participant</i>	Greece
• Developed a REST API using Spring Boot and participated in sessions on problem solving and software development.	

INTERESTS

Data analysis and decision-support systems | Process optimisation and structured problem solving | AI applications in real-world systems
