SUMMARY

Graduate student pursuing an MSc in Computer Science & Engineering at DTU, specializing in Artificial Intelligence and Algorithms. Interested in intelligent systems, software development, and applying AI techniques to real-world problem solving.

EDUCATION

Technical University of Denmark (DTU)	2024 – Present
<i>MSc in Computer Science and Engineering (AI & Algorithms)</i>	Lyngby, Denmark

University of East London & Metropolitan College	2021 – 2024
<i>BSc (Hons) in Computer Science – First Class (80%)</i>	Patras, Greece

- Awarding Institution: University of East London, Teaching Institution: Metropolitan College

TECHNICAL SKILLS

Programming : Java, Python, SQL, MySQL, HTML, CSS, PHP

Tools : GitHub, Git, Figma, JavaFX

PROJECTS

Multi-Agent AI Client – Hospital Domain (DTU) 2025

- Designed and implemented an advanced multi-agent system client for cooperative planning in a hospital domain.
- Developed coordination logic, state representations, and efficient search strategies for multi-agent levels.
- Optimized performance under competition constraints (time-outs and joint-action limits) in the DTU MAVIS framework.

ACTIVITIES

Disability Tech Hackathon	2026
<i>Participant – Inclusive Technology Innovation</i>	Denmark

- Collaborated in a multidisciplinary team to design and prototype technology solutions addressing real-world accessibility challenges for people with disabilities.
- Participated in workshops, mentoring sessions, and final project pitching to industry experts.

EVOLVED-5G European Research Programme	2022
<i>Workshop Participant – 5G Networks Programmability</i>	Greece

SFIMMY 13 – Student Conference on Informatics	2022
<i>Participant</i>	Greece

- Attended sessions on time management, problem solving, and software development, developed a REST API using Spring Boot.
- Sessions: Time Management, Problem Solving, Software Development.

SOFT SKILLS

Teamwork, Collaboration, Communication, Creativity, Problem Solving
